Course of Studies - Contents and Objectives

In the Bachelor programme European Ethnology / Cultural Anthropology as a secondary subject (60 ECTS), students acquire knowledge in a cultural science which uses historical, empirical and comparative methods, has a sociological and socio-historical orientation and is concerned with everyday life, culture and way of life of broad sections of the population of Europe from medieval times to the present. From the wide range of research fields in folklife, there result in both theory and method points of contact with numerous related sciences. This is one of the reasons why folklife sees itself as an integrating field of study with an interdisciplinary bias. In order to understand man better as formed, acting and creating in a cultural perspective and as dependent on historical, economic, social, intellectual and socio-cultural processes, a wide range of methods is employed to analyse evidence of culture transmitted in material and traditional form.

This is achieved with modules dedicated to the following fields: European cultures and societies, working methods and empirical research in cultural sciences, identities and lifestyles, material culture and museology, culture in media and communications, and an introduction to European ethnology. They develop abilities, in both individual and group work, in cultural/analytical understanding, critical appraisal and solution-oriented treatment of cultural phenomena and socio-cultural problems present and past.

The Bachelor programme in European Ethnology/Folklife with its methodical, subject-specific and extra-disciplinary skills, is thus also a preparation for flexible response to tasks in various career fields (such as museums and media, culture management and tourism, at universities and other educational establishments, or self-employment).
