History

as a degree subject in a Bachelor's degree programme with 2
majors
(85 ECTS credits)

Examination regulations version: 2009
Responsible: Faculty of Arts, Historical, Philological, Cultural and Geographical
Studies
Responsible: Institute of History

Course of Studies - Contents and Objectives

The Bachelor programme History as a main subject (120 and 85 ECTS) has the following individual focal points:

- specialist historical knowledge from all historical epochs; besides German history, this includes European and world history as well as aspects of comparative regional history concentrated on fixed geographical areas
- methods and working techniques in the study of history
- the ability to supplement constantly and in step with the continued advance of knowledge the fundamental knowledge acquired during studies
- a critical appreciation of both historical sources and the results of historical research
- rational powers of judgment in complex historical questions
- the ability to communicate knowledge and the present-day view of history as a contribution to political education and to enable political participation in a democratic society
- completing under supervision a largely independent paper on a thematically and chronologically narrowly defined topic from the historical field using methods and historical perspectives learnt during studies

Furthermore, students acquire important fundamental knowledge and competences for an ensuing Master programme in History or another thematically related or comparable course of studies. Graduates are equipped to find orientation flexibly in a wide range of task areas and are therefore suited to numerous career fields. Here one should mention in particular the education sector (universities, schools) and the communication of cultural knowledge and history in the broadest sense, but also the areas of tourism, museums, media, publishing and industry.

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

Information literacy in an academic context: search strategies and tools; using the library's electronic resources; resources for subjects offered by the Faculty of Arts (bibliographies, databases, catalogues, journals, reference books); online searches and search engines; overview of additional resources (eLearning etc.); reference management.		
Intended learning outcomes		
Students know what information is needed for what purpose. They are able to locate information that is relevant within their discipline and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. Students are able to manage and process the information they have found, using reference management software and eLearning tools. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their theses.

Allocation of places		
Number of places: 5-50. There is a restricted number of places. If necessary, places will be allocated as follows: Students of the degree programmes of the respective subject-specific focuses will be given preferential consideration. The remaining places, if and when any become available, will be allocated to students of the other natural sciences degree programmes. In each of the above-mentioned groups, 30% of places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. The remaining 70% of places will each be allocated by lot.

This module discusses advanced topics in the sub-disciplines of history, taking the available source material as well as the current state of research into account. It places facts and details in a pan-European historical context. Problems in cultural, social, structural, and economic history, the history of society, and the history of mentalities as well as interdisciplinary problems are also considered.		
Intended learning outcomes		
This module focuses on equipping students with specialist historical knowledge as well as expanding and consolidating this knowledge. Students gain an insight into advanced topics in the sub-disciplines of history, into the broad and diverse range of careers in history, and into the diverse range of methods used by historians.

This module discusses horizons of interpretation in the investigation of complex structural and systematic processes, both epochal and cross-epochal, in the sub-disciplines of history. It also explores sources, methods, and theories of history and its sub-disciplines in detail, discussing selected narrowly defined problems in depth.		
Intended learning outcomes		
Students are able to familiarise themselves with more complex issues, employing the methods of the disciplines and taking into account relevant source material and secondary literature as well as the findings of related disciplines. They are able to analyse and interpret sources and accounts relating to the sub-disciplines of history.
