The tutorial deals with the practise of writing: How do I urge a good argument? How far does a smart wording distinguish from an awkward one? When does a sentence is not only correct, but also nice and smart? What do you need to know if the intelligibility of a text should be ensured? How does a text receives argumentative density and rhetorical subtlety? The writing will exemplarily be practised on subjects that are relevant to the discipline, for example: How a recension about a subject book is written, how is the discussion of an evening of theatre or a literary novelty is written?

Intended learning outcomes

Concerning the sub-module argumentation and formulation: Students have the ability to formulate and argue as well as the ability to structure texts; Additionally, they will acquire stylistic, argumentative and structural basic principles of important text and linguistic levels.

Application, translation and reflection of fundamental subject-specific and teaching-practical concepts of an example of school reality; Planning, preparation, implementation, reflection and evaluation of a proper teaching approach; Generic formulation of a non-fiction and teaching analysis as a planning decision as well as the textualisation of the teaching planning in a scheme of articulation; Systemic expansion of methodical know-how and reflection of possibilities and limits of generic methodical arrangements.

Intended learning outcomes

During the course, students have already acquired the course objects, which are extrapolated from an important perspective, in a learning objective and compentence-oriented, lesson plan compliant, methodically target-aimed and pedagogical and subject-didactic way and are dimensioned for specific sequences or intentions of a course. Students will be able to assign these aspects, which are guided by the extension of professional skill and self-competence, to scholastic practice. In an inependent lesson approach, the link between theoretical knowledge and scholastic practice can be tested. Students can realise their planning, implementation and evaluation in course and practice phases. Students are able to make a vocational field ascertaining change of role and perspective and put themselves to the test of scholastic reality. In doing so, they extend their communication, presentation and contemplation skills.

Contents

Consolidation and application of ideas, approaches and methods of the sub-discipline didactics (linguistic or literature/media teaching incl. children and youth literature, which has not been chosen in the advanced module) including technical contents for the scholastic practice; Preparation of theoretical principles and empirical findings for the linguistic and literary socialisation including the media change as well as the condition of target-oriented teaching-learning processes and the reference to reality of educational contents; Ideas and practice-oriented contexts of oral or written communication in a cultural context as well as the acquisition processes literary or linguistic knowledge including the historical change of text production, text reception and language; Skills about modelling of learning environments and learning scenarios with particular regard to appropriate teaching subjects and the skill acquisition or development processes during German classes; Development of a differentiated methodical repertoire of action; Independent interpretation processing of a research publication including the presentation (e.g. PPP, homepage, poster,...).

Intended learning outcomes

Students consolidate their knowledge and qualifications concerning the sub-discipline didactics, which has not been chosen in the advanced module, in order to extend their subject-didactic competency and contemplation skills for an integrative German class. Next to theory and practice references, students will acquire current empirical findings of the teaching and learning research in particular and apply these findings to contents of a German class in a subject-didactic contouring. For this, they acquire on the basis of current research literature the required knowledge, which they will present during the course in an appropriately way and dialogically interview about possibilities to affiliate the subject teaching. This acquisition, mediation, presentation and evaluation of contents have to be seen as extension of the self-competence considering the technical contents. Moreover, students acquire fundamental knowledge of a course associated empirical established perception and control of specific teaching and learning processes in pedagogical contexts. Students are able to deal with reading matter that associates the course as well as with educational material, textbook or competent sources, which are relevant for German class. Furthermore, students independently work out a current publication from the specialised teaching and learning research in linkage to the course object and introduce this to the seminar context in an appropriate and self chosen presentation form. In this way, they extend, next to their methodological competence, the dealing with academic texts and current research literature.
