| The students are able to recognise institutional, curricular and pedagogical requirements of compatible education and evaluate their effectiveness (also compared to international standards). They are able to rank Grundschule in the national and international education system as a space for learning and experiencing with its specific task and profiling. They can diagnose learning difficulties and performances and arrange appropriate support measures. They are also able to conceive and evaluate how different possibilities of organising start of school and initial tuition in pedagogical and school-specific respects influence further learning at school. |                   |                                      |

| Based on research results considering historical transformation processes, the module deals with the significance of Grundschule within the German school system as well as at an international level. It provides an insight into its forms of organisation and depicts its range of tasks depending on contemporary theoretical assumptions about education as well as on political and social demands. Furthermore, it introduces teaching models specific to Grundschule in view of their professional requirements and proven effects. |                          |   |

| The students know the significance and forms of organisation of German Grundschule and are able to compare and evaluate them at an international level. They are able to identify and pedagogically evaluate the range of tasks of Grundschule within its contemporary context dependencies. The students become acquainted with the professional requirements and empirically proven effects of teaching models specific to Grundschule and can subsequently draw conclusions for their own future teaching.                               |                          |   |

| <b>Contents</b>   |  |  |
| <p>In this course we study basic contents, questions and issues of the didactic fields "creating movement", "playing with and against each other" and "promoting health" by evaluating our own practical experiences. We specify these fields by studying central aspects of the integration of movement-oriented topics into school life. We playfully examine the promotion of fitness and coordination in the individual fields. In this context, we discuss aspects of organisation and safety and find differentiation possibilities specific to individual types of school. We use examples from motoric plays and small games with and without a ball to experience and evaluate basic principles, problems and possibilities of playing with and against each other. The module components "Creating Movement" and "Playing with and Against Each Other" each contain specific aspects of "Promoting Health".</p> |  |  |
| <b>Intended learning outcomes</b>   |  |  |
| <p>The students have basic competencies in the three didactic fields "creating movement", "playing with and against each other" and "promoting health". They know the basic, school-type-specific criteria of planning, conducting and evaluating teaching/learning processes in physical education classes. The students know teaching/learning concepts to support the development of coordination and stamina in class. They are able to apply various organisation forms and differentiation possibilities of the integration of movement-oriented topics into school life. Furthermore, they know how to integrate knowledge about health maintenance and health promotion in the context of sports activities and human movement.</p>   |  |  |
