

## Subdivided Module Catalogue for the Subject

# Didactics in Science of Sport (Secondary School)

as Didaktikfach with the degree "Erste Staatsprüfung für das Lehramt an Hauptschulen"

> Examination regulations version: 2009 Responsible: Faculty of Human Sciences Responsible: Institute of Sport Science

## **Abbreviations used**

Course types:  $\mathbf{E} = \text{field trip}$ ,  $\mathbf{K} = \text{colloquium}$ ,  $\mathbf{O} = \text{conversatorium}$ ,  $\mathbf{P} = \text{placement/lab course}$ ,  $\mathbf{R} = \text{project}$ ,  $\mathbf{S} = \text{seminar}$ ,  $\mathbf{T} = \text{tutorial}$ ,  $\ddot{\mathbf{U}} = \text{exercise}$ ,  $\mathbf{V} = \text{lecture}$ 

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

## **Conventions**

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

## **Notes**

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

## In accordance with

the general regulations governing the degree subject described in this module catalogue:

#### LASP02009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

#### 30-Jan-2013 (2012-59)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

## The subject is divided into

#### Contents

In this module the students independently work on a topic from the area of sports science and/or subject didactics of sports. The topic is selected in consultation with the thesis supervisor and the aim is to write a scientific thesis.

#### **Intended learning outcomes**

The students are able to independently examine a topic relevant to sports science and its corresponding literature. In doing so, they apply the knowledge and techniques that they acquired during the teaching degree programme. They are able to write down and present the results of their work in accordance with scientific norms whilst taking into account possible aspects of subject didactics.

**Courses** (type, number of weekly contact hours, language — if other than German)

no courses assigned

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)

written thesis (40 to 60 pages)

Language of assessment: German, exceptions in accordance with Section 29 LPO I (examination regulations for teaching degree programmes)

This module includes esplacial aspects and historica cultural hackgrounds of movement and spects. We use							

This module includes ecological aspects and historico-cultural backgrounds of movement and sports. We use innovative movement fields and informal learning situations to test self-determined and experience-based learning. The students acquire a first-hand understanding of the backgrounds and topics of recreational sports and trend sports in view of movement science.

## **Intended learning outcomes**

The students acquire essential professional skills in identifying, understanding, classifying and evaluating concepts of experience-based pedagogy. They study facets of (youth-)cultural movement practice and evaluate the importance of self-determined movement for their own movement career. Furthermore, the students acquire professional and methodological competencies in monitoring and supporting self-determined movement learning processes of children and juveniles.

Intende	ed lear	ning outcomes						
The students acquire professional skills in reviewing, classifying and evaluating the methodical principles of physical education in a conceptual manner. They know the effects of subject-didactic concepts on teaching practice and are able to use these concepts in practice to plan physical education classes and conceptualise school sports programmes. At the same time, they are able to be critical of such planning and evaluating guidelines.

In this course we use the example of gliding on ice and snow to assess movement patterns in snow and winter sports from a pedagogical point of view. For this purpose, we study the principles of anthropology and movement science. We take into account central principles of movement science and evaluate them on the basis of ice and snow sports. Apart from the historical roots and epistemological principles of movement theory, we also discuss didactic perspectives of teaching and learning how to glide on ice and snow. We examine and debate the current scientific knowledge that enables the students to teach movement topics in the field of winter and snow sports in a differentiated and systematic manner.

#### **Intended learning outcomes**

The students acquire essential professional skills in reviewing movement pedagogy of ice and snow sports in a conceptual manner. They are able to specify them in view of sport didactics and to demonstrate them by conducting teaching/learning practice. Furthermore, they acquire key competencies in the field of safety education in winter sports.

**Courses** (type, number of weekly contact hours, language — if other than German)

V (no information on SWS (weekly contact hours) and course language available)

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)

written examination (approx. 30 minutes)

Contents					

In this module we discuss central principles of sports biology and training sciences and establish connections to sports practice. In this way, the students acquire scientific knowledge about movement and sports. The seminars elaborate on the topics from the lecture and discuss consequences and implementation possibilities whilst taking into account aspects of movement science.

#### **Intended learning outcomes**

The students acquire essential professional skills in sports biology and training sciences and and are able to establish connections to sports practice. They acquire differentiated methodological competencies by examining and comparing central terms, concepts and methods in view of various movement fields, training goals and target groups.
