<p>A placement to give students the opportunity to gain an insight into classroom practice. A particular focus is on gaining initial experience of planning, analysing, and teaching lessons in the religious education classroom. The seminar that accompanies the placement gives students an opportunity for theory-based reflection on the experiences they have made. Comparing their practical classroom experiences with what they have learned in theory-based courses, students become familiar with the tensions between the theory and the practice of teaching and develop the ability to take their own position on the issue. The focus of the seminar is on the theory-based reflection on the students' experiences, not on the exploration of theoretical positions.</p>		
Intended learning outcomes		
<p>At the end of the module, students will have developed the ability to implement teaching models into classroom practice. They will know criteria that will enable them to engage in theory-based reflection upon the experiences they have made in the classroom.</p>

Information literacy in an academic context: search strategies, resources, reference management, copyright, etc.		
Intended learning outcomes		
Students know what information is needed for what purpose. They are able to locate information that is relevant within their discipline(s) and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their papers.
