

Subdivided Module Catalogue
for the Subject

Educational Science of Developmental and Intellectual Disabilities

as vertieft studierte sonderpädagogische Fachrichtung
(specialisation in special education studied with a focus on
the scientific discipline)
with the degree "Erste Staatsprüfung für das Lehramt für
Sonderpädagogik"

Examination regulations version: 2015
Responsible: Faculty of Human Sciences
Responsible: Institute of Special Education

Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

LASPO2015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

17-Nov-2015 (2015-234)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Course-related Teaching Placement in Education for People with Developmental and Intellectual Disabilities (accompanied study 1) (6 ECTS credits)				
Students studying for a teaching degree in special education must complete placements pursuant to Section 93 Subsection 1 Nos. 4 and 5 LPO I (examination regulations for teaching-degree programmes). Students who successfully completed the respective modules are awarded ECTS credits that, pursuant to Section 22 Subsection 2 No. 5 Letter f) LPO I (examination regulations for teaching-degree programmes), are a prerequisite for admission to the Erste Staatsprüfung (First State Examination).

Thesis (4 ECTS credits)				
Students studying for a teaching degree in special education must complete a "additives Modul". This module is offered by the respective studied special education subject. The module is grouped and the ECTS credits obtained are counted in the subject Erziehungswissenschaften pursuant to Section 10 Subsection 4 LASPO (general academic and examination regulations for teaching-degree programmes).				
o6-G-Schwerb-152-m01	Education and didactics in the context of intensive special needs	4	NUM	27
Freier Bereich (general as well as subject-specific electives)				
Teaching degree students must take modules worth a total of 15 ECTS credits in the area Freier Bereich (general as well as subject-specific electives) (Section 9 LASPO (general academic and examination regulations for teaching-degree programmes)). To achieve the required number of ECTS credits, students may take any modules from the areas below. Freier Bereich -- interdisciplinary: The interdisciplinary additional offer for a teaching degree can be found in the respective Annex "Ergänzende Bestimmungen für den "Freien Bereich" im Rahmen des Studiums für ein Lehramt".

Thesis (10 ECTS credits)

Preparation of a written Hausarbeit (thesis) in accordance with the provisions of Section 29 LPO I (examination regulations for teaching-degree programmes) is a prerequisite for teaching degree students to be admitted to the Erste Staatsprüfung (First State Examination). In accordance with the provisions of Section 29 LPO I, students studying for a teaching degree Sonderpädagogik may write this thesis in the subject they selected as sonderpädagogische Fachrichtung (special education specialization). Pursuant to Section 29 Subsection 1 Sentence 2 LPO I, students may also choose to write an interdisciplinary thesis.

Contents		
Current pedagogical, didactic and psychological developments and challenges of Education for People with Developmental and Intellectual Disabilities in the context of ethical, anthropological, teleological and methodological questions.		
Intended learning outcomes		
The students have basic knowledge of pedagogy, didactics and psychology in the context of Education for People with Developmental and Intellectual Disabilities. Therefore, they are able to critically evaluate current orthopaedagogical and social developments and challenges in schooling, education, promotion, therapy, support and assistance of children, juveniles and adults with developmental and intellectual disabilities and can comment on these issues in oral and written form.		
Courses (type, number of weekly contact hours, language — if other than German)		
S (1) + S (1) + S (1)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)		
1) written examination (approx. 60 minutes) or 2) presentation (approx. 30 minutes) with written elaboration (approx. 8 pages) or 3) presentation (approx. 40 minutes) or 4) oral examination of one candidate each (approx. 10 minutes) or 5) oral examination in groups (groups of 6, 10 minutes per candidate) or 6) term paper (approx. 15 pages) creditable for bonus

Contents		
Clinical pictures and syndromes of people with developmental and intellectual disabilities. Knowledge of psychological explanatory and therapeutic approaches as well as types of therapy. Selected observation and test methods of development and intelligence diagnostics.		
Intended learning outcomes		
The students know special behaviour patterns that can occur in people with developmental and intellectual disabilities. They have basic knowledge of individual intervention procedures, application possibilities and limits of intervention measures in everyday school life. They are able to develop observation plans and evaluate and apply individual test methods.

Contents			
Understanding, role and tasks of science/scientific work in the field of Education for People with Developmental and Intellectual Disabilities, principles of a humanistic-hermeneutic approach, methodological standards (of quantity- and especially quality-oriented methods). Criteria and standards of scientific work (Bachelor's thesis); conceptualising and carrying out or taking part in research projects in preparation for the Bachelor's thesis.			
Intended learning outcomes			
The students have basic knowledge of scientific work in the field of Education for People with Developmental and Intellectual Disabilities and are able to work in accordance with and critically evaluate methodological standards and requirements. They are able to plan and critically evaluate small research projects in the field of Education for People with Developmental and Intellectual Disabilities in a largely autonomous manner. Furthermore, they can present these projects in the seminar.

Contents		
Independent scientific examination of a relevant topic of Education for People with Developmental and Intellectual Disabilities. The guidelines of writing the Hausarbeit (thesis) according to § 29 LPO I are laid down in § 23 LASPO.		
Intended learning outcomes		
Self- and social competence: By writing the Hausarbeit (thesis), the students have shown their ability to independently work on a topic of Education for People with Developmental and Intellectual Disabilities. Methodological competence: The students are able to work on a question pertaining Education for People with Developmental and Intellectual Disabilities according to scientific methods and to professionally discuss and present scientific findings and results. Subject and professional competence: By writing the Hausarbeit (thesis), the students have proved that they have advanced their subject and professional competence in a selected area of Education for People with Developmental and Intellectual Disabilities.		
Courses (type, number of weekly contact hours, language — if other than German)		
No courses assigned to module

Contents		
Principles of inclusive pedagogy and didactics for learning in heterogeneous groups; implementation in school (including preschool); subject-didactic insights into learning areas relevant to Special Education; analysis and structuring of teaching material; combination of theoretical considerations and practical exercises; different forms of open learning for individualised and differentiated learning		
Intended learning outcomes		
The students know different approaches to group learning for disabled and non-disabled children and juveniles and are able to assess and explain the advantages and disadvantages. The students know possibilities and materials for individualised and differentiated classes. They are able to analyse and organise school and pre-school learning areas. They know organisation forms and pedagogical implications of learning in heterogeneous groups. The students are able to organise work groups. They are able to work in teams, share responsibilities and discuss the presentation of results. The students can present theory-driven contexts of justification. They are able to transfer results of scientific work to school processes, evaluate the use of means in school and create own learning materials.

Contents		
We discuss special tasks and methods of the promotion of communication as well as theories about human communication. We examine possibilities of physical and non-physical communication for children and juveniles with different impairments/handicaps. Diagnostic questions support the planning and reflection of individual support measures. Different focus areas cover the variety of possibilities of promoting communication.		
Intended learning outcomes		
The students acquire basic knowledge of varied fields of the promotion of communication in FSkmE. The students become acquainted with special tasks and methods in the field of the promotion of communication competencies. They carry out and evaluate analyses of individual conditions, identify and evaluate individual requirements and deduce possible support measures.

In this module, we discuss literacy acquisition and maths as well as their adaptation to the individual needs of pupils. In doing so, we focus on didactic, curricular, theoretical and research-oriented aspects of Special Education.			
Intended learning outcomes			
The students know the scientific discourse of cultural techniques, learning requirements in the support focus area of mental development, organisational framework conditions of the different types of school, didactic methods and media suitable for reaching content-related subject-didactic goals as well as the corresponding state of research.

Education during the lifespan		o6-G-Leben-152-mo1
Module coordinator		Module offered by
holder of the Chair of Special Education IV		Chair of Special Education for People with Intellectual and Developmental Disabilities
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
Schooling and education in extracurricular fields of action; principles and organisation of transitions; interdisciplinary work and cooperation between different occupational groups; legal and sociological aspects		
Intended learning outcomes		
The students are familiar with preschool and extracurricular fields of action and know about the importance of interdisciplinary teamwork. They understand the historical and socio-political variability of educational institutions. They are able to examine and design preschool and extracurricular organisation forms. The students can take on communicative and cooperative responsibility and can work together in various ways.		
Courses (type, number of weekly contact hours, language — if other than German)		
S (2) + S (2)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)		
1) written examination (approx. 60 minutes) or 2) presentation (approx. 20 minutes) with written elaboration (approx. 8 pages) or 3) presentation (approx. 30 minutes) or 4) oral examination of one candidate each (approx. 15 minutes) or 5) term paper (approx. 10 pages) creditable for bonus

Contents			
In this module, we discuss literacy acquisition and maths as well as an exemplary selection of various subjects which are taught in the support focus area of mental development. Furthermore, we talk about the adaptation of these subjects to the individual needs of pupils. In doing so, we focus on didactic, curricular, theoretical and research-oriented aspects of Special Education.			
Intended learning outcomes			
The students know the scientific discourse of cultural techniques, students of Didactics for Grundschule also know the scientific discourse of other exemplary, important learning areas/subject didactics. They know learning requirements in the support focus area of mental development, organisational framework conditions of the different types of school, didactic methods and media suitable for reaching content-related subject-didactic goals as well as the corresponding state of research.			
Courses (type, number of weekly contact hours, language — if other than German)			
S (2) + S (1)			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)			
1) written examination (approx. 60 minutes) or 2) presentation (approx. 20 minutes) with written elaboration (approx. 8 pages) or 3) presentation (approx. 30 minutes) or 4) oral examination of one candidate each (approx. 15 minutes) or 5) term paper (approx. 10 pages) creditable for bonus

Contents			
Fundamental questions and essential contents of Education for People with Developmental and Intellectual Disabilities. Connections to general Curative and Special Education; historical review; fundamental ethical questions; anthropological aspects of understanding mental disabilities; central ideas and goals of education; mind-sets and prejudices; situation of parents and siblings; fields of action. Fundamental didactic and methodological questions and principles of the support focus area of mental development: Goals and contents of classes; basic forms of teaching and learning; teaching principles, school organisation, planning and organisation of classes.			
Intended learning outcomes			
The students have basic orientational knowledge and are able to perceive and describe the phenomena of "mental disabilities" and the social situation of mentally disabled people from different perspectives and can evaluate the resulting (special) requirements for education, schooling and teaching.			
Courses (type, number of weekly contact hours, language — if other than German)			
V (2) + S (2) + Ü (1)

Contents		
<p>The students are introduced to school practice of the individual support focus areas of special-needs schools as well as to practice and special educational organisation of the individual subjects at an early stage. After a period of classroom observation, the students plan their own classes, implement special educational support measures and make multiple teaching attempts. Furthermore, they take on the following tasks: Knowledge of special educational tasks and goals of the curriculum for the individual grades of the respective form of special-needs school including support in preschool institutions; mobile special education assistance (mSH) and mobile special education services (MSD), classroom observations regarding different approaches to achieve learning goals as well as regarding media use and possibilities of monitoring learning progress, determination of special educational needs of individual children and formulation of diagnosis-oriented education plans; knowledge of possibilities of individual support in the context of pedagogy and psychology.</p>		
Intended learning outcomes		
<p>Self- and social competence: The students are able to discuss and evaluate their own and other students' teaching plans and attempts in a methodological and critical manner. They make own teaching attempts to test themselves as teachers and therefore develop pedagogical competencies and learn to critically evaluate their own pedagogical actions. Methodological competence: The students are able to independently plan long-term or medium-term lesson stages and to plan, carry out and critically evaluate classes according to technical, subject-didactic, general and special educational criteria, especially concerning Education for People with Developmental and Intellectual Disabilities. Subject and professional competence: In the lectures on didactics, the students have acquired knowledge of general didactics, instructional psychology and didactic approaches and methods of Education for People with Developmental and Intellectual Disabilities. They utilize these competencies to plan, conduct and evaluate teaching attempts.</p>

Contents		
Theory-driven class planning; conceptualising own classes; problems regarding school laws and school practice; institutional questions, exemplary connections between theory and practice, questions of applying general and subject didactics.		
Intended learning outcomes		
The students advance their professional competence by applying and reflecting their knowledge and experiences from previous modules in a methodological manner. The work placements and the subsequent counselling boost the students' self-competence and encourage them to ask questions about the necessary qualifications and personality traits of Special Education teachers. They advance their methodological competence by practising and scientifically reflecting their skills.

Managing Director of the Institute of Special Education		Institute of Special Education
ECTS	Method of grading	Only after succ. compl. of module(s)
5	(not) successfully completed	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
Different contents referring to fields of school and teaching and further (work) fields of Special Education (e.g. subject-didactic, methodological and specific contents of practice)		
Intended learning outcomes		
Subject and professional competence in the corresponding area, methodological competence regarding individual aspects of the professional field of Special Education.		
Courses (type, number of weekly contact hours, language — if other than German)		
S (2) + S (2)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)		
1) written examination (approx. 60 minutes) or 2) presentation (approx. 20 minutes) with written elaboration (approx. 8 pages) or 3) presentation (approx. 30 minutes) or 4) oral examination of one candidate each (approx. 15 minutes) or 5) term paper (approx. 10 pages) creditable for bonus		
Allocation of places

Managing Director of the Institute of Special Education		Institute of Special Education
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
2 semester	undergraduate	--
Contents		
Principles and fundamental questions of child and adolescent psychiatry as well as psychotherapy; psychopharmacotherapy; ADHD; tic disorder & ADHD II; conduct disorder and addiction; depression and bipolar disorders; suicide, attempted suicide and self-injuring behaviour; personality disorders; dyslexia, dyscalculia, speech and motor development disorders; eating disorders; compulsion; anxiety disorders; dissociative and somatoform disorders; posttraumatic stress disorder, acute stress disorder, adaptive disorder; autism; mental disability; epilepsy and organic brain syndrome; psychoses; elimination disorders; sexual abuse and assessment of credibility; deprivation, attachment disorders and assessment of child access and custody		
Intended learning outcomes		
The students acquire knowledge of epidemiology, aetiology, diagnosis, therapy and prognosis of mental disorders in childhood and adolescence. They know theories on the development of mental disorders in childhood and adolescence, they are able to identify these disorders and to adequately deal with them in class and in their future occupational field and can set up an appropriate therapy if necessary.

Contents		
Learning in heterogeneous groups; realisation possibilities in fields of action in the context of school; conflict area subject didactics - special educational needs. Analysis and structuring of teaching materials; creating teaching materials; combining theoretical considerations and practical exercises; different forms of open learning for individual and differentiated learning		
Intended learning outcomes		
Professional competence: The students know possibilities and materials for individualised and differentiated classes. They are able to analyse and organise school and preschool learning areas. They know organisation forms and pedagogical implications of learning in heterogeneous groups. Social competence: The students are able to work in teams, share responsibilities and discuss the presentation of results. Self-competence: The students are able to transfer results of scientific work to school processes, evaluate the use of means in school and evaluate or create learning materials. They are able to present and defend their own work results.

Contents		
Communication theories, interaction and group dynamics, psychological basics of special educational counselling, elements of conversation techniques, counselling and cooperation, elements of conversation techniques when talking to people that have difficulties with verbal expression, collegial counselling and supervision, counselling concepts (e.g. cooperative, solution-oriented, psychology of learning, systemic ...), methods of cooperation, counselling in crisis situations, counselling in the course of education and life planning.		
Intended learning outcomes		
The students know basic aspects of human communication, conversation techniques, counselling and cooperation between the participants in the process of education and support, also especially regarding people that have difficulties with verbal expression. They acquire action and conversation competencies and are able to apply and observe conversation techniques, analyse conversation and counselling situations and develop proposals for continuation. They become acquainted with strategies to facilitate individual education and life planning and to overcome crisis situations of pedagogical importance.

Contents		
We discuss early theoretical concepts and their development or modification (for example Georgens/Deinhardt) in the context of current theories (for example WHO, inclusion) as well as their effects on scientific research. We examine society's attitude towards disabilities and the development of individual and social identity in the context of disabilities (possibly in the context of specific types of disability). Furthermore, we talk about possibilities of social empathy and ways of improvement as well as aspects of attitude change.		
Intended learning outcomes		
Advanced knowledge of specific theoretical concepts, reflection competence in the context of disabilities and society, increasing problem awareness in the context of disabilities (possibly with a specific focus).

Contents		
Special Education as an academic discipline; subject and purpose of science and scientificity, scientific methods and systems, central and selected scientific-theoretical theories and methods of knowledge acquisition (especially: empirical-analytical approach, critical rationalism, phenomenology, hermeneutics, critical theory, constructivism and systems theory) as well as principles of scientific work -- also based on specific problems and topics of special educational theory, empirical research and practice.		
Intended learning outcomes		
The students are able to examine special educational problems in view of different scientific positions and perspectives (professional and methodological competence). They have advanced their basic knowledge of scientific theory on their own or in small groups (social, methodological and professional competence). By applying different learning techniques, the students extend their knowledge of scientific theory and learn to conduct systematic and methodological research; they are able to independently conduct and evaluate small scientific projects (methodological, social and self-competence).

Contents			
In the corresponding module components, the students become acquainted with the essential approaches of the neighbouring disciplines psychology and ethics and evaluate their theoretical and practical relevance for Education for People with Physical and Complex Disabilities.			
Intended learning outcomes			
The students gain basic knowledge of the psychological and ethical theories relevant to Education for People with Physical and Complex Disabilities. In the field of psychology, they acquire profound knowledge of different important and common psychological approaches in the context of physical impairments and are able to estimate their relevance for the development of children, juveniles and adults with physical impairments and multiple disabilities. They can carry out and evaluate analyses of possible individual requirements and deduce possible support measures. In the field of ethics, the students acquire basic knowledge of theories about ethical action and decision making. They can assess and evaluate their own actions in view of these theories.			
Courses (type, number of weekly contact hours, language — if other than German)			
S (2) + S (2)			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)			
a) written examination (approx. 60 minutes) or b) presentation (approx. 45 minutes) or c) presentation (approx. 30 minutes) with written elaboration (approx. 8 pages) or d) oral examination of one candidate each (approx. 30 minutes) or e) term paper (approx. 10 pages) or f) portfolio (approx. 15 pages)

Pedagogy in connection with learning impairment		o6-L-Päd-152-mo1
Module coordinator		Module offered by
holder of the Chair of Special Education I		Chair of Special Education for People with Learning Disabilities
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
Terms and problems: historical and current; history of the subject (developments in pedagogy, didactics, forms of special educational support); current status of Education for People with Learning Disabilities; social circle: Aetiology and genesis, medical, psychological, sociological aspects; introduction to special educational work fields in the context of learning disabilities; general principles of didactics and methods of teaching in the context of learning disabilities; didactic models and teaching concepts; principles and forms of teaching in the context of learning disabilities; socialization background, child development and learning		
Intended learning outcomes		
Basic knowledge of education for people with learning difficulties; basic reflection competence in view of different disciplinary aspects; methodological competence: Examination of fundamental scientific texts of pedagogy (understanding central information, lines of argument and contexts).

Introduction to speech and language pathology and otorhinolaryngology		o6-S-FFRC-152-mo1
Module coordinator		Module offered by
holder of the Chair of Special Education III		Chair of Special Education and Therapy in Language and Communication Disorders
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	undergraduate	--
Contents		
Basic knowledge of classification, aetiology, pathogenesis and symptomatology of language, speech and communication disorders; basic knowledge of linguistics, provided that it is relevant for the identification, scientific explanation, diagnostics and therapy of disorders.		
Intended learning outcomes		
Self- and social competence: The students have acquired subject-specific knowledge from various disciplines (mainly speech therapy). They are able to examine the topic by critically evaluating models and theories. Methodological competence: The students analyse scientific texts in a hermeneutic way and critically discuss them in the plenum as well as in groups. Subject and professional competence: The students gain a detailed and interdisciplinary overview of language, speech, and communication disorders which are a topic of Speech and Language Pathology. They particularly acquire professional medical knowledge as a basis for scientific work and action in diagnostic/therapeutic practice.		
Courses (type, number of weekly contact hours, language — if other than German)		
V (2) + V (2)

Contents		
Knowledge of the historical development of Speech and Language Pathology; advanced knowledge of the pre-conditions of language and speech; principles of language acquisition and theories; introduction to the main clinical pictures of language and speech in the context of cognitive and mental disabilities		
Intended learning outcomes		
Self- and social competence: The students concentrate on studying contents of Speech and Language Pathology and neighbouring disciplines. Methodological competence: The students methodically acquire professional knowledge of Speech and Language Pathology and neighbouring disciplines and critically evaluate these disciplines in view of their application possibilities and requirements in theory and practice. Subject and professional competence: The students acquire indispensable basic knowledge of theory construction in Speech and Language Pathology, which is always interdisciplinary. They especially learn about pronunciation (respiration, phonation, articulation) and forms of dysarthria relevant to Speech and Language Pathology. Based on these principles, the students acquire knowledge of speech disorders in the context of cognitive and mental disabilities.

Contents			
Phenomena, terminology, criteria and norms, classification, epidemiology, institutions, historical aspects, legal basics, education and education difficulties, principles of didactics and teaching, basic explanatory perspectives, central influencing factors of behavioural disorders (especially aspects of family, school or society).			
Intended learning outcomes			
The students are able to apply basic knowledge to achieve a differentiated understanding of behavioural disorders (professional competence, self-competence). The students conduct independent and extensive research on their own and in groups to advance their basic knowledge (professional competence, social competence, methodological competence). By acquiring differentiated basic knowledge, the students gain first competencies in dealing with behavioural disorders (self-competence).

Contents			
Basic perspectives for the explanation of behavioural disorders; key and selected psychological and sociological approaches to the explanation of behavioural disorders in view of medico-biological aspects; key and selected phenomena in the context of behavioural disorders; introduction to scientific work.			
Intended learning outcomes			
The students are able to apply basic knowledge to achieve a differentiated understanding of behavioural disorders, also in view of specific explanation concepts and specific selected problems (professional competence, self-competence). This knowledge enables them to classify and understand behavioural disorders in children and juveniles and to develop first ideas for dealing with behavioural disorders (professional competence, self-competence, methodological competence). The students have basic knowledge and skills in acquiring, selecting and processing information in the context of scientific work; they can apply their knowledge and skills to the utilization of study group resources (professional competence, methodological competence, social competence).
