Abbreviations used

Course types: E = field trip, K = colloquium, O = conversatorium, P = placement/lab course, R = project, S = seminar, T = tutorial, Ü = exercise, V = lecture

Term: SS = summer semester, WS = winter semester

Methods of grading: NUM = numerical grade, B/NB = (not) successfully completed

Regulations: (L)ASPO = general academic and examination regulations (for teaching-degree programmes), FSB = subject-specific provisions, SFB = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

Freier Bereich (general as well as subject-specific electives)

Teaching degree students must take modules worth a total of 15 ECTS credits in the area Freier Bereich (general as well as subject-specific electives) (Section 9 LASPO (general academic and examination regulations for teaching-degree programmes)). To achieve the required number of ECTS credits, students may take any modules from the areas below.

Freier Bereich (general as well as subject-specific electives) -- open for all teaching degree students irrespective of their subject combinations: For additional courses that are open to all teaching degree students irrespective of their subject combinations (fächerübergreifendes Zusatzangebot), please refer to the respective Annex of the "Ergänzende Bestimmungen für den "Freien Bereich" im Rahmen des Studiums für ein Lehramt" (Supplementary Provisions on the Area "Freier Bereich" in Teaching-Degree Programmes).

Freier Bereich (general as well as subject-specific electives) -- Faculty of Arts, Historical, Philological, Cultural and Geographical Studies: For additional courses offered by the Faculty of Arts, Historical, Philological, Cultural and Geographical Studies for teaching degree students (fakultätsweites Zusatzangebot), please refer to the Annex of the "Ergänzende Bestimmungen der Philosophischen Fakultät (Fakultät für Historische, Philologische, Kultur- und Geographische Wissenschaften) für den "Freien Bereich" im Rahmen des Studiums für ein Lehramt" (Supplementary Provisions by the Faculty of Arts, Historical, Philological, Cultural and Geographical Studies on the Area "Freier Bereich" in Teaching-Degree Programmes).

**Contents**

Application of ideas, approaches and methods of a teaching sub-discipline (linguistic or literature/media teaching incl. children and youth literature) including subject-specific contents on scholastic practise; Consolidation and expansion of conceptual and practical teaching know-how including a critical reflection of teaching key ideas; Consolidation of the transition between educational institutions and the orientation of teaching subjects as well as methodical ideas; Theory-based, practice-oriented analysis of a study area of German classes.

**Intended learning outcomes**

Based on the knowledge that has been acquired in the basis module, students consolidate their professional skills in the sub-discipline didactics (linguistic or literature and media didactics). The focus will be on the correlation of theoretical concepts and technical as well as subject-specific constructs with a real lesson that is lesson plan compliant and meets current requirements. Regarding the issue self-competence, students will work out different role segments of the teaching profession (e.g. short presentation, textualisation of planning decisions, analysis of teaching objects, types of presentation, moderation). Students acquire a sub-discipline didactic context and also the know-how, which is embedded in theory and practical references, in a proactive as well as reflective way.

### Contents

Discussion of basic topics in mathematics didactics with a focus on didactic aspects (e.g. dyscalculia, evaluation of teaching materials for mathematics in Grundschule, using computers for teaching mathematics in Grundschule, selected topics and research results in modern mathematics didactics, theoretical foundations of mathematics didactics, dealing with heterogeneity in the classroom, organising substantial learning environments).

### Intended learning outcomes

The student is acquainted with theoretical concepts in the didactics of mathematics, knows important aspects of planning and analysing teaching of mathematics, masters different strategies for teaching and learning and can assess and employ them.

### Contents

Fundamental range of subjects, concepts, approaches and methods of linguistic, literature and media courses and the respective sub-discipline teaching as well as the concretisation in reference to tasks of the educational institution school; Acquisition and advanced structure of the oral and written language acquisition as well as the linguistic and reading socialisation and parameters of influence; Domain-specific aspects of imparting of a teaching-learning or skill-oriented subject teaching; Realising of an teaching sequence into planning relevant categories; Transition between educational institutions or living and learn stages and their teaching aspects as teaching field of action in order to design acquisition processes or imparting processes (mostly by self-studies accompanied by reading matter).

### Intended learning outcomes

During courses, students will acquire fundamental knowledge of subject-specific teaching and learning processes of the sub-discipline didactics (linguistic, literature and media didactics). During the seminar, students will be familiar with associated reading matter and current problem fields and tasks, which are required as professional skills for the planning, implementation and contemplation of an independent modern German class. In doing so, students develop an understanding of a theory-driven, practice-oriented, subject-related field of action in pedagogical contexts.

Contents

In this course we study basic contents, questions and issues of the didactic fields "creating movement", "playing with and against each other" and "promoting health" by evaluating our own practical experiences. We specify these fields by studying central aspects of the integration of movement-oriented topics into school life. These aspects include ways to implement such topics as well as possibilities to organise and differentiate curricular and extra-curricular sports. The students extend their knowledge about movement pedagogy by studying the development of balance and coordination skills. The module components "Creating Movement" and "Playing with and Against Each Other" each contain specific aspects of "Promoting Health".

Intended learning outcomes

The students acquire basic skills in the three afore-mentioned didactic fields. They are familiar with the essential criteria of planning, conducting and evaluating coordination training processes in sports and they know the application fields of various pieces of sports equipment as well as equipment set-ups that aid in improving balance. They become acquainted with the peculiarities of infantile motoric play and with various organisation forms and differentiation possibilities of the integration of movement-oriented topics into school life. Furthermore, they learn about health maintenance and possibilities of health promotion in the context of working out and exercising.

Additional information

In accordance with Section 38 Subsection 1 No. 5 LPO I (examination regulations for teaching degree programmes), this module is designed for students pursuing a teaching degree for the German Hauptschule who do not study Sports/Physical Education as Unterrichtsfach (with a focus on the scientific discipline) or Didaktikfach (with a focus on teaching methodology).

**Contents**

This module includes ecological aspects and historico-cultural backgrounds of movement and sports. We use innovative movement fields and informal learning situations to test self-determined and experience-based learning. The students acquire a first-hand understanding of the backgrounds and topics of recreational sports and trend sports in view of movement science.

**Intended learning outcomes**

The students acquire essential professional skills in identifying, understanding, classifying and evaluating concepts of experience-based pedagogy. They study facets of (youth-)cultural movement practice and evaluate the importance of self-determined movement for their own movement career. Furthermore, the students acquire professional and methodological competencies in monitoring and supporting self-determined movement learning processes of children and juveniles.

Module offered by: Chair of Religious Education

ECTS: 5
Method of grading: numerical grade
Only after succ. compl. of module(s)

Duration: 1 semester
Module level: undergraduate
Other prerequisites: --

Contents:
Discussing primary sources and research literature, this course will convey essentials, methods, and ways of thinking in systematic theology. It will also provide an introduction to theological discussions of, with, and for pupils.

Intended learning outcomes:
At the end of the course, students will be familiar with essential concepts and will have developed subject-specific thinking in the area of dogmatics. They will not only be able to comprehend and reproduce theological texts but also to situate them within a context and render them adequately. Students will be able to describe issues in theology for, and together with, pupils as well as to apply their knowledge of systematic theology when they discuss those issues with their pupils.

Module coordinator: holder of the Chair of Religious Education
Module offered by: Chair of Religious Education

ECTS: 5
Method of grading: numerical grade
Duration: 1 semester
Module level: undergraduate
Other prerequisites: --

Contents:

Concepts of God, the relationship between God and humankind, theological interpretations of history, ethical views expressed in different Old Testament texts and by their authors in their cultural environments with special attention to the Pentateuch and the Prophets. Training in textual analysis methods. Didactic approaches to teaching the Bible to pupils. Exploring Old Testament texts as well as the Bible in general (its structure, origins, etc.) in a manner that is appropriate to the age group students are teaching.

Intended learning outcomes:

At the end of the course, students will be familiar with essential concepts and will have developed subject-specific thinking in the area of Old Testament theology. Students will have developed the ability to situate issues within a historical context in a problem-orientated manner. In addition, they will have developed the fundamental abilities to verbally express this knowledge in an appropriate manner. They will be able to understand and interpret the content of the texts and to interrelate them with each other. In addition, students will have developed the ability to simplify Old Testament texts for teaching purposes and assess whether they relate to the everyday lives of their pupils.

Discussion of central topics in teaching mathematics in Grundschule taking into account subject-specific and didactic aspects as well as possibilities of implementation in the classroom, also including modern technologies.

Intended learning outcomes

The student is acquainted with the mathematical basics of elementary school mathematics and can explain them. He/She knows about the objectives of teaching mathematics in elementary school, fundamentals of developmental psychology and didactics of mathematics, as well as important models, presentations and media which can be employed in teaching mathematics in elementary school. She/he knows about common difficulties and problems of pupils in the acquisition of mathematical skills, and can employ didactical principles and teaching and learning strategies.

Courses (type, number of weekly contact hours, language — if other than German)

This module comprises 3 module components. Information on courses will be listed separately for each module component.

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component 10-M-MGS-P-092: Mathematics in German Grundschule (Exam in Arithmetic, Geometry and Application of Mathematics)

- 1 ECTS, Method of grading: numerical grade
- written examination (approx. 120 minutes); if announced by the lecturer, the written examination can be replaced by an oral examination of one candidate each (approx. 15 minutes) or an oral examination in groups (groups of 2: approx. 20 minutes, groups of 3: approx. 30 minutes) or by a written and/or multi-media portfolio (as announced)
- Only after successful completion of module components: Successful completion of the two module components 10-M-MGS-1 and 10-M-MGS-2 is a prerequisite for participation in module component 10-M-MGS-P.

Assessment in module component 10-M-MGS-1-092: Mathematics in German Grundschule (Arithmetic)

- 5 ECTS, Method of grading: (not) successfully completed
- exercises: At the beginning of the course, the lecturer will specify the type and scope of exercises to be successfully completed over the course of the semester for the module component to be considered successfully completed.

Assessment in module component 10-M-MGS-2-092: Mathematics in German Grundschule (Geometry and Application of Mathematics)

- 4 ECTS, Method of grading: (not) successfully completed
- exercises: At the beginning of the course, the lecturer will specify the type and scope of exercises to be successfully completed over the course of the semester for the module component to be considered successfully completed.

### Contents

Religious education in modern society must deal with religious and cultural pluralism. This module discusses efforts made to incorporate pluralism into the religious education classroom. It investigates the benefits of pluralism in the religious education classroom and discusses the features of a plural religious education classroom.

### Intended learning outcomes

At the end of the course, students will have become familiar with the anthropological and social features of a plural society. They will be able to formulate the implications of pluralism for religious education and for their own teaching. They will be able to name the features of a plural religious education classroom.

### Other prerequisites

Admission prerequisite to assessment: regular attendance of seminars (minimum 80% of sessions offered).

### Contents

In the seminar "Sport Didactics" we discuss selected aspects of planning classes and of the development of school sports and establish connections to the basic topics of subject didactics. We use examples from various movement fields to transfer this theoretical knowledge to exemplary classes. We plan, conduct and evaluate physical education classes in view of the didactic problem of choosing subjects for physical education.

### Intended learning outcomes

The students acquire essential professional skills in reviewing, classifying and evaluating the methodical principles of physical education in a conceptual manner. They become acquainted with the effects of subject-didactic concepts on teaching practice and learn to use these concepts in practice to plan physical education classes and conceptualise school sports programmes. At the same time, they learn to be critical of such planning and evaluating guidelines.
