Project learning as an individual teaching and studying unit within Science and Social Studies involves different work stages from drafting and planning to organising and executing up to evaluating and documenting. The module offers a platform for individual project learning within a practical unit and for the conceptual development of own project ideas.		
Intended learning outcomes		
The students are able to conceptualise, plan and oversee projects. They can prepare and edit contents from the field of Science and Social Studies and Natural Sciences in a didactical manner and are able to document the implementation of a project regarding its content and didactics.		
Courses (type, number of weekly contact hours, language — if other than German)

Grundschule as an educational institution in the German school system, implementation forms and tasks of education specific to Grundschule, diagnosis and evaluation of learning processes in Grundschule, pedagogical meaning of starting school and initial tuition regarding the educational development of pupils.		
Intended learning outcomes		
The students are able to recognise institutional, curricular and pedagogical requirements of compatible education and evaluate their effectiveness (also compared to international standards). They are able to rank Grundschule in the national and international education system as a space for learning and experiencing with its specific task and profiling. They can diagnose learning difficulties and performances and arrange appropriate support measures. They are also able to conceive and evaluate how different possibilities of organising start of school and initial tuition in pedagogical and school-specific respects influence further learning at school.

Contents		
Based on research results considering historical transformation processes, the module deals with the significance of Grundschule within the German school system as well as at an international level. It provides an insight into its forms of organisation and depicts its range of tasks depending on contemporary theoretical assumptions about education as well as on political and social demands. Furthermore, it introduces teaching models specific to Grundschule in view of their professional requirements and proven effects.		
Intended learning outcomes		
The students know the significance and forms of organisation of German Grundschule and are able to compare and evaluate them at an international level. They are able to identify and pedagogically evaluate the range of tasks of Grundschule within its contemporary context dependencies. The students become acquainted with the professional requirements and empirically proven effects of teaching models specific to Grundschule and can subsequently draw conclusions for their own future teaching.

Research-oriented evaluation of different didactical teaching and learning approaches in initial written-language tuition of Grundschule, performance and personality-based diagnosis and supporting opportunities regarding literacy acquisition, exemplary planning, contemplation and evaluation of learning situations involving written language.		
Intended learning outcomes		
The students are able to evaluate different didactical teaching and learning approaches concerning their requirements for implementing them in class and their possible benefits for pupils. They are capable of diagnostically detecting difficulties concerning literacy acquisition, assessing tools for diagnosis and evaluation of initial written-language tuition and planning exemplary written-language classes.

Contents		
The module contains didactical basics of Science and Social Studies and its historical as well as methodical context of justification. Goals, contents, methods and media of Science and Social Studies as well as anthropological conditions for object examinations and students' specific learning and development conditions are gathered as a point of reference for organising learning processes in Science and Social Studies.		
Intended learning outcomes		
The students know basic educational goals and didactical principles of Science and Social Studies and are able to assess its educational value. While selecting and structuring contents of Science and Social Studies, the students cover its basic functions and principles.

Contents		
<p>In this course we study basic contents, questions and issues of the didactic fields "creating movement", "playing with and against each other" and "promoting health" by evaluating our own practical experiences. We specify these fields by studying central aspects of the integration of movement-oriented topics into school life. We playfully examine the promotion of fitness and coordination in the individual fields. In this context, we discuss aspects of organisation and safety and find differentiation possibilities specific to individual types of school. We use examples from motoric plays and small games with and without a ball to experience and evaluate basic principles, problems and possibilities of playing with and against each other. The module components "Creating Movement" and "Playing with and Against Each Other" each contain specific aspects of "Promoting Health".</p>		
Intended learning outcomes		
<p>The students have basic competencies in the three didactic fields "creating movement", "playing with and against each other" and "promoting health". They know the basic, school-type-specific criteria of planning, conducting and evaluating teaching/learning processes in physical education classes. The students know teaching/learning concepts to support the development of coordination and stamina in class. They are able to apply various organisation forms and differentiation possibilities of the integration of movement-oriented topics into school life. Furthermore, they know how to integrate knowledge about health maintenance and health promotion in the context of sports activities and human movement.</p>
